Contents

NUMBER 1, JANUARY 1981

1 *Ejvind Budtz-Jørgensen:* Occlusal dysfunction and stress
11 *J. L. Thomson, C. Main, F. C. Gillespie and W. Stephen:* The effect of salivary contamination on fissure sealant–enamel bond strength
19 *P. M. Baxter, W. B. Davis, and J. Jackson:* Toothpaste abrasive requirements to control naturally stained pellicle
27 *L. V. Christensen:* Jaw muscle fatigue and pains induced by experimental tooth clenching: a review
37 *A. Zitz, I. Gedalia and R. Grajower:* Addition of fluoride compounds to acrylic resin plates: bending strength and fluoride release
43 *Grayson W. Marshall, Jr and Sally J. Marshall:* X-ray diffraction and SEM/EDS analyses of phases in new dental amalgams
55 *E. C. Combe, D. C. Watts and E. H. Greener:* The rheological properties of polyelectrolyte cements. I. Polycarboxylates
61 *D. C. Watts, E. C. Combe and E. H. Greener:* The rheological properties of polyelectrolyte cements. II. Glass ionomers
69 *Tore Dérand:* Residual stresses in metal–ceramic crowns
75 *Tore Dérand:* Stresses in the anchor crowns of a metal–ceramic bridge in model experiments
81 *T. Low:* The treatment of hypersensitive cervical abrasion cavities using ASPA cement
91 *W. D. McCall and M. Hoffer:* Jaw muscle silent periods by tooth tap and chin tap

NUMBER 2, MARCH 1981

97 *Esko Eerikäinen:* Prosthetic treatment of dentinogenesis imperfecta
103 *W. D. McCall, Jr, E. N. Gale and A. A. Uthman:* The variability of EMG silent periods in TMJ patients
107 *Tore Dérand:* Stresses in cantilever metal–ceramic bridge in model experiments
113 *M. T. M. Jiffry:* Analysis of particles produced at the end of mastication in subjects with normal dentition
121 *G. L. Lingard, E. H. Davies and J. A. von Fraunhofer:* The interaction between lining materials and composite resin restorative materials
131 *M. Addy: In vitro* studies into the use of denture base and soft liner materials as carriers for drugs in the mouth
143 *J. A. Hobkirk:* Patterns of cortical bone growth around alumina implants

155 *M. Addy and R. Handley:* The effects of the incorporation of chlorhexidine acetate on some physical properties of polymerized and plasticized acrylics
165 *M. A. Hussain, E. W. Bradford and G. Charlton:* A technique for the production of standard test specimens of aluminous dental porcelain
175 *Bernard Joniot, G. Richard-Tournier and C. Vigneau:* Determination of the usual physiological occlusal position by radiotelemetry—a preliminary report
183 *C. H. Lloyd and G. R. V. Baxter:* The effect of mercury on the fatigue life of a dental gold alloy
191 *H. J. Mueller:* Electron microscopy samples: replication using dental inlay wax.

NUMBER 3, MAY 1981

193 *L. V. Christensen:* Facial pains and the jaw muscles: a review
203 *M. MacEntee and R. Lakowski:* Instrumental colour measurement of vital and extracted teeth
209 *R. Omar and M. D. Wise:* Mandibular flexure associated with muscle force applied in the retruded axis position
223 *H. Fujii, Y. Inubushi, E. Mushimoto and H. Mitani:* An excitatory response preceding the silent period in masseter electromyographs
231 *M. M. Negm, E. C. Combe and A. A. Grant:* Mechanical and adhesive properties of a newly developed group of pulp capping and base materials
237 *A. B. Tveit and N. R. Gjerdet:* Fluoride release from a fluoride-containing amalgam, a glass ionomer cement and a silicate cement in artificial saliva
243 *S. Palla, J. O. Bailey, Jr, H. Grassl and M. M. Ash, Jr:* The effect of bite force on the duration and latency of the menton tap silent period
255 *D. H. Retief and E. Woods:* Is a low viscosity bonding resin necessary?
267 *L. V. Christensen:* An electromyographic and cephalometric study on facial pains and facial morphology in children
279 *G. T. Clark, P. L. Beemsterboer and J. D. Rugh:* Nocturnal masseter muscle activity and the symptoms of masticatory dysfunction
287 Book reviews

NUMBER 4, JULY 1981

293 *L. C. Richards and T. Brown:* Dental attrition and degenerative arthritis of the temporomandibular joint
309 *J. R. Bausch, C. de Lange and C. L. Davidson:* The influence of temperature on some physical properties of dental composites
319 *C. L. B. Lavelle, D. Wedgwood and W. B. Love:* Some advances in endosseous implants
333 *W. T. Wozniak, T. P. Muller, R. Silverman and J. B. Moser:* Photographic assessment of colour changes in cold and heat-cure resins
341 *T. Maruyama:* Oral rehabilitation of functional mesio-occlusion

359 *E. Galon, M. Friedman, I. Gedalia and J. Rajstein:* Solubility of enamel powder following treatments with 1% sodium dodecyl sulphate in the presence and absence of fluoride
363 *C. S. Teo and M. D. Wise:* Comparison of retruded axis articular mountings with and without applied muscular force

NUMBER 5, SEPTEMBER 1981

377 *Ryoichi Furuya and Björn Hedegård:* The silent period in the masseter and the anterior temporal muscles at repeated registrations
389 *Matthijs M. A. Vrijhoef and Adam J. Spanauf:* On the early diametral tensile strength of dental amalgam
391 *J. P. Standlee, A. A. Caputo and J. P. Ralph:* The condyle as a stress-distributing component of the temporomandibular joint
401 *N. K. Sarkar, R. A. Fuys, Jr, C. M. Schoenfeld, L. M. Armstrong and J. W. Stanford*: The tooth–amalgam interaction
413 *L. V. Christensen:* Progressive jaw muscle fatigue of experimental tooth clenching in man
421 *Susan M. Wright:* Oral awareness and oral motor proficiency in retchers
431 *C. L. Davidson, P. P. E. Duysters, C. De Lange and J. R. Bausch:* Structural changes in composite surface material after dry polishing
441 *Eiko Mushimoto:* The role in masseter muscle activities of functionally elicited periodontal afferents from abutment teeth under overdentures
457 *A. F. Käyser:* Shortened dental arches and oral function

NUMBER 6, NOVEMBER 1981

463 Editorial
465 *E. Rydinge, J. Goldberg, L. Sanchez, K. Lambert and E. Munster:* Clinical evaluation of high copper amalgam restorations
473 *L. V. Christensen:* Isometric endurance of masseter muscle in children
479 *G. Siebert:* Recent results concerning physiological tooth movement and anterior guidance
495 *C. Alexandridis, C. E. Thanos and A. A. Caputo:* Distribution of stress patterns in the human zygomatic arch and bone
507 *C. F. Valcke and T. O'Duggan:* The porosity and roughness of four direct filling resins
517 *A. Jodaikin:* Experimental microleakage around ageing dental amalgam restorations: a review
527 Index to Volume 8
